

Term End Examination

May/June 2024

COS2071B - Data Mining and Warehousing

Question Paper ID: 032703

Faculty/School	School of Computer Science and Engineering	Term	III
Program	SYBCA	Duration	2 Hours 30 Minutes
Specialization	-	Max. Marks	70

Section - 1 (7 X 10 Marks)

Answer any 7 questions

1	Define Data and Information. Briefly explain data mining and its need in today's business.	10 marks	CO2	Understanding
2	Explain major requirements, challenges, and applications in data mining.	10 marks	CO2	Understanding
3	With a neat block diagram, explain in detail the knowledge discovery process.	10 marks	CO2	Remembering
4	Define the data warehouse and its various architectures with the help of suitable diagrams.	10 marks	CO3	Understanding
5	Explain the following with the help of suitable examples: a. Slice b. Drill down c. Multidimensional data model.	10 marks	CO2	Understanding
6	Explain various issues related to data cleaning and discuss multiple data pre-processing techniques.	10 marks	CO2	Understanding
7	Explain the following in detail. a. Data transformation. b. Normalization in detail. c. Data reduction.	10 marks	CO2	Remembering
8	Illustrate the Decision tree. Explain the classification process using the decision tree.	10 marks	CO1, CO2	Understanding
9	Discuss the significance of attribute selection measures in data mining. Briefly explain the Gini index and Entropy.	10 marks	CO2, CO4	Understanding

10	Write the short notes on the following measures: a. Precision b. Recall c. Confusion matrix d. Cross-validation	10 marks	CO3	Applying
