

Lab 6: Heart Disease Classification Report

Dataset: Heart Disease (UCI ID 45). Binary classification task: predict presence of heart disease (target > 0) vs no disease (target = 0).

Exploratory Data Analysis

Total samples after cleaning: 297

Features used: 13

Disease prevalence: 46.1%

Model Training & Evaluation

Algorithm: Decision Tree (max_depth=5, min_samples_split=10, min_samples_leaf=5)
Train/Test split: 80/20
Accuracy: 0.8500

Classification Report:

	precision	recall	f1-score	support
0	0.83	0.91	0.87	32
1	0.88	0.79	0.83	28

accuracy			0.85	60
macro avg	0.85	0.85	0.85	60
weighted avg	0.85	0.85	0.85	60
